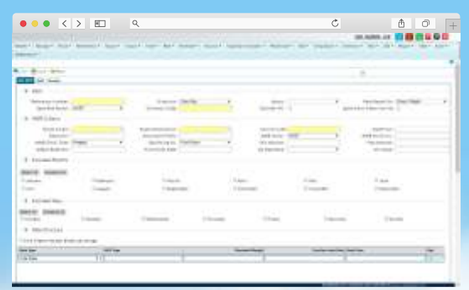
- One-stop, and new-age technological and business solutions
- Intelligent, intuitive, and deeply integrated platform and intelligence
- Real-time actionable business intelligence
- Scalable and innovative business models
- Various modules to choose from based on needs and demands
- Absolute priority to quality and credibility

nGen RES

Next-Generation Cargo Reservation Management System (RES)

The cargo booking system is a pivotal facet of the airline industry its organisational strategies. nGen RES aims to make cargo reservations in a speedy yet seamless manner. The software allows dynamic pricing using multiple combinations and, at the same time, prevents revenue leakages. Cargoflash provides an efficient and smooth solution to manage the entire Air Cargo booking process. It delivers e-AWB, e-Freight, e-CSD, CIMP and C-XML.

nGen CRA



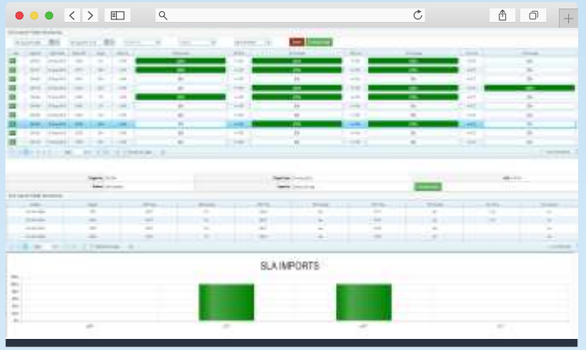
Next-generation Cargo Revenue Accounting (CRA)

Cargo Revenue Accounting is about managing all the paperwork including Airway Bills, invoicing and other concerned billings and documentations. Handling too much paperwork on regular basis can become a challenging task but the nGen Cargo Revenue Accounting (CRA) allows its users to perform this process with minimal human interface. The specialised nGen CRA software integrates every accounting process and delivers statistics in real-time. From loading to invoicing, the AWB audit is rightly maintained by Cargoflash.

nGen WMS

Next-generation Warehouse Management System (WMS)

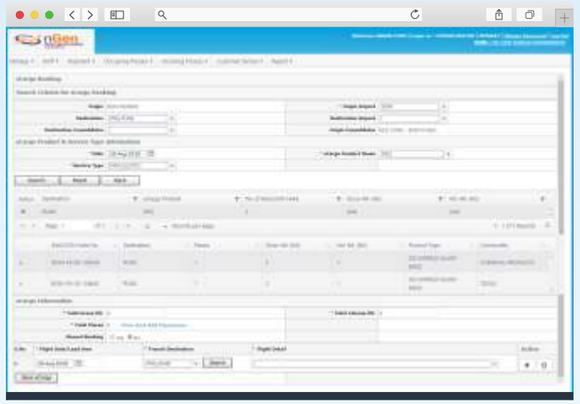
The nGen WMS by Cargoflash provides a one-stop solution to all the requirements surrounding the warehouse and inventory management in the Air Cargo arena. The software systematically covers all the steps of the warehouse process including inventory management, measurement and quantification of SLA's, complete acceptance and delivery process, thereby ensuring effective management at the warehouses, using cutting-edge technology. Furthermore, the staff roster and workflow management are also available in this system.



nGen E-Commerce

Next-generation e-Commerce & Virtual Integration System (D2D)

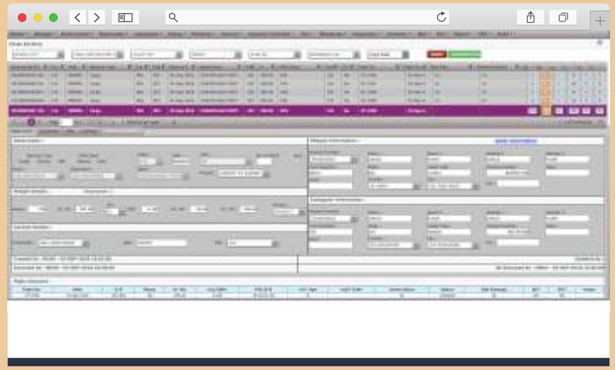
The nGen e-Commerce, Door-to-Door (D2D) System is the software that efficiently manages all the reasonable aspects of the D2D service, starting from booking the service to tracking the consignments in real-time. This express system enables the operator with complete transparency and real-time updates of the consignments besides handling every facet of the process, effortlessly. Also, it brings the airlines an opportunity to become a virtual integrator and be able to operate into B2C express door pick up/deliveries with minimum investment.



nGen RPS

Next-generation Cargo Revenue Planning System (RPS)

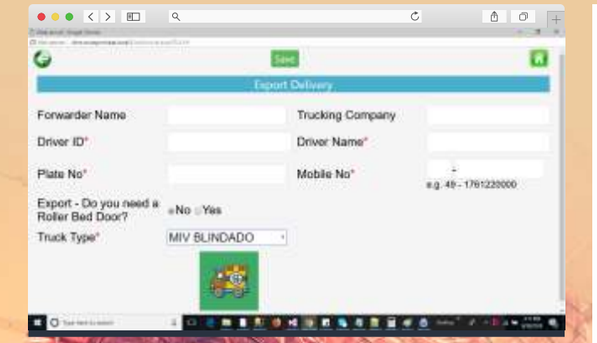
The nGen Revenue Planning System (RPS), by Cargoflash, allows clients with an efficient system for dynamic pricing based on the remaining capacity and route management. Cargoflash's RPS enables one to effectively manage the budgets and deliver real-time analytics and business intelligence for a smoother process of revenue planning and processing. Also, the system promises to provide an analytical forecast of capacity, demand, target and pricing.



nGen DMS

Next-generation Slot and Door Management System (DMS)

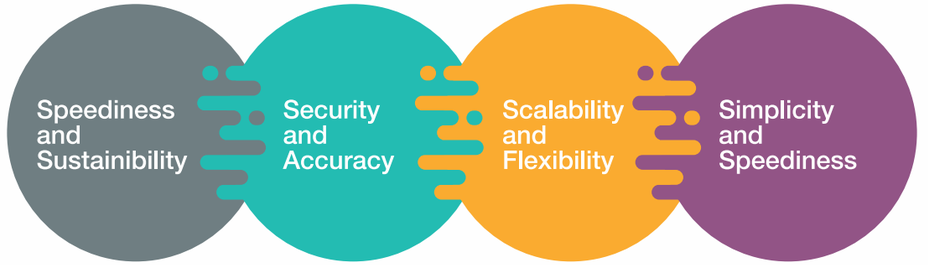
Several companies to date, manage Slot and Door Management System (DMS) manually, leading to time and resource negligence and loss of cargo or drop inefficiency. The cutting-edge DMS by Cargoflash is a one-of-a-kind system that ensures the “Right Slot to the Right Truck at the Right Time”. The nGen Cargo DMS by Cargoflash allows its consumers to make a prior booking of service slots. From Slot Monitoring to Dock Management; enabling a better cargo flow leading to an efficient warehouse, the nGen DMS has it all.



Focusing on quality, with constant improvements and innovations, is embedded within the core of Cargoflash. We, ensure that the company maintains globally-acclaimed and best practices throughout the development, testing, implementation and maintenance of its systems. With a certification of CMMI Level 3 for quality, the company focuses on adherence to quality, creating solutions that overcome all the expectations while also scaling business operations to a new high.

Cargoflash assures quality

Cargoflash quality



Cargoflash ensures a secured cloud for data protection of its clients' specifics at every step of the process. The company maintains appropriate safeguards, controls, and exercises due diligence and access controls designed to protect personal data and infrastructure against unauthorised access, use, and/or disclosure. Also, we aim to achieve zero defect for the company. We offer updated analytics with real-time pricing and ensure a better experience that all our clients are looking for. Moreover, Cargoflash has recognised the aspect of simplicity as a key component for staying ahead in the crowd of competitors. The company promises the 'right' domain for the 'right' service in one go, providing smart and hassle-free processes, thus, avoiding multiple iterations.

Reasons to **believe** in Cargoflash
